Remarks:

Temp Drop Pacific UZPA13

UZNT13 = Atlantic

UZPN13 = Pac E of dateline

Aspen V2 did not report temp + there clearly was one
nor did V3

does not add extra ~~temp~~

Screen 800 FDETA does not update over bar screen

V3 = UZNT13 UZPN13

once flight is vid all recent realtime data back in

V3 = E of dateline does change to UZPN
west end of dateline
keeps UZNT

still reports extra data

not UZPA

ONLY when remaining a level
